Only external referrals are included in this process. All referrals for CYP are carefully screened by a group of experienced clinicians. Their expertise allows them to assess each case individually and determine the most appropriate support for the child. In some instances, they may conclude that another agency, such as TIC+ or Young Gloucestershire, is better equipped to provide the necessary support. Therefore, the referral is signposted to the most appropriate service to ensure the child receives the right support the first time. We believe this approach ensures that each child receives the most suitable care tailored to their specific needs.
